

TITAN

Description

The **TITAN** Vandal Resistant Bollard fills a gap in the market where the current products offer limited protection from abuse and vandalism. With its welded steel construction, cast alloy head and toughened acrylic lens it provides impact protection, whilst the lack of exposed fasteners makes it tamper resistant to maintain a durable light source for a lifetime. Also available as an optional extra is the *Protective Guard*, which provides additional armour against impact damage.

Designed to comply with Energy Authority requirements, **TITAN** meets or exceeds the relevant Australian Standards, and the unique PEC and lamp change method ensures it is maintenance friendly.

Application

Pedestrian Malls, Plazas, Forecourts, Landscape areas, Car Parks, Shopping Centres, etc.
