

TOORAK MAJOR LED

The Toorak Major LED is the 2nd generation of this venerable public lighting luminaire. With the physical profile unaltered, the distinctive heritage cues remain as it is re-launched with 21st century lighting efficiency. Featuring the Candela (UK) 72LED board, with LEDs by CREE, the Toorak Major 72LED uses just 70 watts (total power consumption) and is the most energy efficient luminaire in its class ...at just 40% of the energy consumption of the old 150W HPS lanterns (total system watts). The Toorak Major LED boasts exceptional green credentials, and has been designed specifically for the requirements of Australia's Major Road Lighting Applications. With the use of solid state electronics in the LED board and the driver, the luminaire has a service life in excess of 20 years – and comes with an unprecedented 5 year warranty. Exceeding the requirements of AS1158, its reliability has increased while its service costs have decreased with the use of an IP66 optic chamber which guarantees against water & dust ingress.

FEATURES

- 70 watt total system power.
- IP66 chamber & IP67 electronic driver.
- NEMA 7 Pin PEC base.
- LED Board features 72 Cree LEDs.
- Lumen output 10,886 lms.
- Colour temperature 4000K.
- Integrated Meanwell 334mA driver.
- Exceeds the requirements of AS1158.
- Weight = 18.3kg. Sail area = 0.199m²
- Optional Pre-wired with supply cable.
- Exceptional pole spacings.
- Aeroscreen visor.
- Ultra low running costs AND maintenance costs.
- Design life - in excess of 20 years.
- 5 year Warranty.
- Roads Approved in Victoria, other states pending.
- Available wattages are 70W & 140W.
