

Tapered Octagonal

Octagonal columns are the ideal design for commercial or road lighting applications, offering simple, sturdy and economical solutions for various applications.

Octagonal columns feature a sturdy tapered 8 sided section, with or without outreach arms.

Optional outreach arms can be either straight or curved. Other options are trunnion adaptors and cross arms.

Options List

- Single Outreach.
- Double Outreach.
- Ezi-Fit inground base section.
- In-ground mount.
- Base plate mount.
- Spigot to suit various types of light fittings.

Standard finish Galvanized.

Commonly used colours.

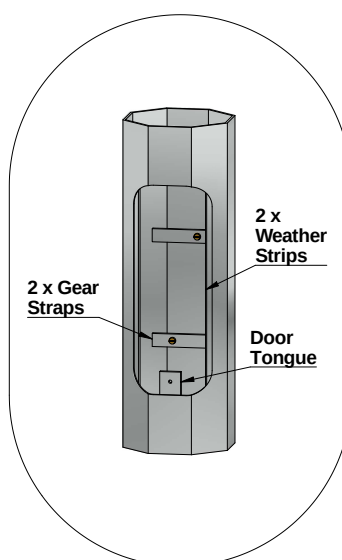

Extensive range of colours available. For coastal environments a coastal paint specification is available on request.
