

# Ezi-Fit in-ground base sections

The Vicpole Ezi-Fit in-ground mounting base suits all installation applications up to 12m overall pole height.

## **Advantages**

- Saves you \$hundreds on foundation installation costs on every column.
- Can be ordered to fit most styles of poles.
- Can be installed prior to the style of column being decided.
- Shorter installation times with no need to build rag bolt cages or pour concrete foundations.
- Can be installed by either the civil contractor or the electrical contractor.
- Pre-installation of electrical connections can be carried out.
- Column can be adjusted at the base plate connection *after* installation for a perfect finish.
- Provides a tidy and presentable project site prior to column arrival as Ezi-Fit can be capped protecting all electrical connections.
- Installation instructions available on request.
- Ezi-Fit is generally a stock item.

## **Cost Savings**

- The cost of installing a Rag Bolt Assembly including concrete, making up the cage and rag bolt positioning can be significant.
- Ezi-Fits require minimal amounts of crushed rock, sand & rapid set concrete to complete the installation, saving time and money.

## **Specifications**

Planting depth	Overall pole height
1.2m	columns up to 5m
1.5m	columns up to 8m
1.8m	columns up to 10m
2.0m	columns up to 12m
